COLOURS AND MATERIALS

The chemical composition is made up of natural granite, acrylic resin and, like all the sinks manufactured with the technological leadership G.P.S. system, has an even mass resulting in high resistance to stains, impact and temperature changes. The uniqueness of this product is that have been added the metal particles, making the product with a brilliant and shining finish. The target is

to obtain special "metallic effects". The different finishes allow a perfect match between the sink and the other stainless steel components in the kitchen.
